# Threekit for Furniture

The industry's most comprehensive 3D, AR and Virtual Photography platform.

One solution for unlimited creation, management and distribution of your furniture visuals

Mix and match to create infinite custom product options with a single 3D asset

Why Threekit?

40% Conversion rate increase when you replace product photography with 3D.

60% Of online shoppers want more interactive 3D and AR experiences.

90% Reduction in photography costs versus traditional photography.

Exclusive Benefits

Enable Real-time Product Customization

Let shoppers visually customize, personalize, and configure your product in real-time to buy faster.

Configurable Augmented Reality (AR)

Let customers create and place millions of potential product configurations in their space, right from their browser

Create Photorealistic Product Shots at Scale

Use 3D to create infinite photorealistic images at a fraction of the cost of traditional photography.

SIF File Integration

Pipe your SIF file data directly into our platform to build 3D configurable products exactly to spec.

Dynamic Dimensions

Automatically add and display a product's dimensions to drive purchase confidence.
